

Bharath Components — Competitive Intelligence Report

Prepared for benchmarking against Vector Technics | Research date: 11 September 2026

Legal / brand	Bharath Components (100% subsidiary of IoTechWorld Avigation Pvt. Ltd., per company website)
HQ	Gurugram, Haryana, India
Incorporation	Separate legal-entity details not established from reviewed primary sources; brand/subsidiary relationship is stated by c
CIN	Not established from reviewed sources
Revenue	Not established from reviewed public primary sources.
Competitive threat	High
UAV overlap	High — broad component overlap, especially motors, propellers, ESCs and power/control hardware.

Business & product profile

Ownership: 100% subsidiary of IoTechWorld Avigation Pvt. Ltd., according to Bharath Components' website.

Products: BLDC motors, drone propellers, ESCs, flight controllers, motor pumps, GNSS, GCS and radar systems; PDB and other drone components.

Manufacturing: Company states components are developed in-house or sourced from trusted Indian manufacturers; it promotes indigenization and Indian manufacturing.

Technology: Company claims 90%+ indigenization; GCS, PDB, motor and component development for agriculture, logistics, surveillance and other UAV applications.

Customers: Business-partner list is published on the website; specific commercial contract values were not established.

Strengths: Backed by IoTechWorld; broad component portfolio; strong agriculture-drone ecosystem connection; Indian-indigenization positioning.

Weaknesses: Less evidence in reviewed sources of a standalone, broad propulsion stack comparable to Vector's full propulsion-plus-power positioning.
